Rex vs. H. H. H. Miller.

A case which had caused a lot of comment in Blueberry district was heard by Honorable Mr Justice Boyle on Tuesday the 14th, when Henry H H Miller appeared, to answer to four serious statutory charges which had been preferred against him. Nearly the whole day was taken up with the first charge; most of the time being taken up by a rigid cross examination of the witnesses for the Crown. After the defence evidence was put in, the case was dismissed. A second charge was proceeded with, but was dismissed before any defence evidence was produced.

As the Crown prosecutor did not offer any evidence in the other two cases, they also were dismissed.

The accused was completely exonerated, the Judge stating that he was convinced that the evidence of the main Crown witnesses was untrue. Geo. J. Bryan acted for the defence; E B Cogswell for the Crown.

Beware Traveling Repairmen

Owners of radio-receiving sets here were given a visit last week by one of those fly-by-night repairmen, some of whom recommend themselves by intimating that they are connected with the radio branch of the Dept. of Marine. One of the specialties of this tribe is jipping the victim on the sale of tubes. On looking over your set the "repair" man invariably recommends you to buy two or three of his tubes to replace those he has condemned in the set; the replacements he sells usually are used tubes for which the victim must pay the price of new ones. He works this by having the "new" tubes in cartons having the name of a reliable manufacturer on them. This trick was worked on a school teacher last Thursday. After the alleged "repair" man had departed, the unsophisticated teacher found he had been "hooked" in the sum of \$4.50.

Miss Ashcroft Buried.

Miss Esther A Ashcroft passed away on Saturday Nov. 18, at her residence on Railway ave. Deceased had been ailing for some time, and her demise was not unexpected. She had a genial, kindly disposition, and had a host of friends, who will miss her. She is survived by three sisters: Mrs Jas. Malloch; Mrs Simpson and Miss M Ashcroft, both of Edinburg, Scotland. The funeral took place Monday afternoon from Howard's funeral chapel, in Edmonton. Rev W. E. Sieber, of Stony Plain United church, conducted the service, and interment took place in Edmonton cemetery. A large delegation from Stony Plain and district was present at the obsequies.

Scientists Are Making Good Headway In Solving The Secrets Of The Ocean's Depths

From seas which pirates sailed for two centuries in search of Spanish gold the yacht "Caroline" recently returned to Washington with new treasure found in the ocean's depths.

This new treasure comes from attempts to answer the question, "How deep is the ocean?" as well as, "What is in the Ocean Depths?" The answers, so far, are incomplete. But that revealing contributions have been made to the store of human knowledge is certain. Still, the survey from the "Caroline," which includes studies in the physics, chemistry and marine and plant life of the waters north of Puerto Rico, covering an area extending from Santo Domingo to the Virgin Islands, has only begun.

Under the direction of Dr. Paul Baruch of the Smithsonian Institution, the exploration, pursued for two months has been made possible by the joint effort of a group of scientists and the co-operation of Eldridge Reeves Johnson, who contributed the use of his yacht and financed the assembling and installation in it of special equipment and instruments.

This winter's exploration was in reality in the nature of a sampling expedition. Primarily it was planned for the purpose of determining what scientific equipment was needed for a detailed survey which is to continue through four winters. Actually much more was accomplished. The Caroline gathered many specimens of deep-sea plant and animal life.

The region just north of Puerto Rico is interesting for one reason, among others: it is the deepest known part of the Atlantic. Depths in excess of five miles have been found (the greatest one, the Blake Deep, being 28,300 feet), and yet greater ones may be discovered. Modern electric sounding equipment by means of which waves of sound are flashed into the deep to be echoed back from the bottom and automatically recorded was used by the ship to check old records or establish new ones.

A single boom, such as might have been seen on a freighter, mounted on the quarterdeck was outwardly the only indication that the "Caroline" might be on some special mission. But inside there was not only mechanical sounding equipment, but instruments for measuring water temperature at different levels; for detecting trends of currents and analyzing the water itself.

Steel cables became fishing lines miles long. There were traps and nets and bait of colored electric lights to lure the luminous denizens of the deep—fish with head and tail lights. Much as bait is matched to the hook by a bass, huge snail, twenty-five feet across, or traps of heavy pipe and wire-net construction, were torn from the steel fishing lines a thousand feet or more below the surface of the Atlantic.

One of the most important results of the winter's cruise was the successful testing of new methods of underwater photography. Two specially designed cameras proved their worth. One was effective 160 feet below the surface, while the other was used at depths down to 1,500 feet.

At times the open deck of the "Caroline" which adjoins the laboratory was covered with thousands of brilliantly colored creatures of the deep sea, unwilling travellers to a new world of light and air. Here, where there was ample light, M. Ellis Cheverly, the artist, painted feverishly to catch the quickly changing hues of some specimen previously not seen by man.

One Qualification
Dora was in the middle of her singing lesson when her mother arrived on the scene. After listening for some time she broke in:

"Ah—er—how is my daughter getting on? Do you think she will eventually make a great singer?"

The music teacher, steeped at a loss for words.

"Well, madam," he said at last, "it's rather difficult to say."

"But you must know by now if she possesses some of the qualifications," said the girl's mother, sharply.

"Well, she's got a mouth," replied the teacher.—*London Answers.*

Bicycle Grows In Favor

Figures For September Show Big Increase In Imports
Certitude that the bicycle is coming into its own again is shown by the importations. Although September is supposed to be late in the year for a great sale of wheels there were actually 515 imported compared with 32 a year ago. As usual the greater number came from the United Kingdom; there were 469 British and 16 from the United States. Contrary to experience 33 motor-cycles came from the United States and seven from the United Kingdom. Usually the majority of these imports are British. However in the case of motor cycles also there were more imported than a year ago.—*Dominion Bureau of Statistics.*

NEW SLIP FOR THE NEW SLIM LINE SILHOUETTE—AND IT'S SO EASILY MADE

Slim lines? Yes, there are slim-lines plenty in the newest fall fashions. You'll be wanting some new costume slips. Today's model is especially designed for the new slim-line frocks.

And easy to make! Cut it out and run it up on the sewing machine in an hour or so. Two parts to the pattern. Finish the upper edge with self bands. Roll the lower edge by hand to give it French accent.

You'll be surprised at how little it will cost to make it.

Choose crepe silk or crepe satin. Style No. 513 is designed for sizes 14, 16, 18, 20 years, 30, 32 and 40 inches bust.

Size 16 requires 2½ yards 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Operates From Light Socket

Tiny X-Ray Capable Of Photographing Entire Body

The smallest X-ray built in this country was demonstrated for the first time to the American Congress of Radiology, at their recent convention in Chicago. Radiologists from all over this country and abroad attended.

The small unit is rated at 58,000 volts and ten milliamperes, and stands in marked contrast to the mammoth 800,000-volt X-ray tube recently installed for cancer treatment at Mercy Hospital, Chicago. The new device operates from an ordinary light socket, is shock-proof, and may be operated in perfect safety by any layman—a combination of virtues long sought by the X-ray industry.

The small set is capable of making X-ray photographs of the entire human body, or it may be carried around and used for making fluoroscopic examinations in industrial plants. It can be used in customs houses to examine clothing, baggage or packages, at race tracks and stables for the "happos" of horses' ankles, in cat and dog hospitals, or for such work as fluoroscopic examination of aeroplane parts.

The baby X-ray can be used with perfect safety by the average man and is of particular value in the examination of suspicious packages. It was stated:

Jewish Soldiers Honored

Bulgaria Unveils Monument To Men Lost In Great War

A monument to the unknown Jewish soldier, dedicated to all Bulgarian members of that race who laid down their lives in the Balkan wars and the world war, has just been unveiled at Sofia, the ceremony being attended by both Jews and Christians.

Speeches extolling the valor of Bulgarian Jews in fighting for the Christian king were made by Gen. Veleff and Col. Tadjer, who recalled that of the 8,500 Jews mobilized before the armistice, 500 were killed in action.

The Bulgarian Jew has always been conspicuous for his bravery, and the Bulgarian Maccabees are said to have given the smartest "turnout" at the International Jewish Congress recently held in Jerusalem.

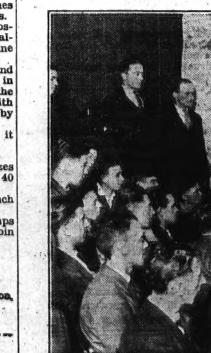

Wreath Was Forgotten

Ceremony To Honor Noted Dieppe Navigator Was Spoiled

An international ceremony was called off at Montreal because the participants forgot to bring along flowers.

A party of distinguished guests from France and Montreal gathered near the city hall to pay tribute to Vauquelin, noted Dieppe navigator of the 18th century, and to place a wreath on his monument. Greetings were exchanged. Speeches were made. And then the ceremony was called off. Somebody, it was explained, forgot to bring the wreath.

LONDON'S TAXI-DRIVERS IN THE MAKING

All types of men are training for the taxi drivers' examinations at the Central Knowledge of London School at Paddington, England. Hundreds of smart new taxicabs are being put on the streets and proprietors are looking for drivers to match the cabs. Over 8,000 London taxi drivers have been passed from the school since 1919. It is estimated that in a four-and-a-half miles radius of Charing Cross, London, there are 4,200 miles of streets, so the student's task is by no means an easy one. Our picture shows one of the classes in progress, with the teacher explaining some intricate traffic regulation in the heart of the British capital.

Interest Is Quickened In Trans-Atlantic Air Travel By Survey Of Northern Route

In Memory Of Hinkler

Symbol Erected On Alps 5,900 Feet Above Sea Level

The late Bert Hinkler, great Australian air ace and squadron leader in the British Air Force, will be a symbol for all fliers from Britain to The East.

The Aero Club of Arezzo has erected to his memory a fine column of white limestone, standing 6,000 feet above sea level, on the Tuscan Alps, near the spot where he crashed last January during one of those furious storms which frequently assail the highlands.

He had left London and was heading for Sydney, Australia. Nothing was heard of him from the morning of his departure from the British capital until four months later in May, when a shepherd going up the Alps near Florence crossed the peak near Campo Magno, and saw wreck, age sticking out of the partly melted snows.

Beneath lay Bert Hinkler's body and the remains of his aeroplane. His diary showed that he had had stormy weather and was trying to cross Italy to reach Brindisi before his next hop to Persia. He must have lost his way in the storm and crashed on a mountain side.

The memorial is a remarkable landmark, and in clear weather can be seen for miles around.

Market For Wheat

Opportunity To Sell Canadian Wheat Exists In China And Japan

Increased markets for Canadian wheat exist in Japan and China, John M. Imrie, managing director of the Edmonton Journal, told the Young Men's Canadian Club at Toronto.

In order to benefit western Canada, he said, there must be fullest co-operation in carrying out the London wheat agreements; willingness to extend concessions to the east for markets for Canadian wheat; reformation of western agriculture to develop diversified farming; stimulation of production; creation of price stabilization boards for domestic food products; extension of intermediate agricultural credits and formation of a farm products marketing commission.

While The Wind Blows

Bob Marquis, a farmer near Abernathy, Texas, need pay no electric light bills. He is a budding Edison and has installed on the farm house roof a wind motor which operates a generator which charges a radio battery which ignites an automobile light bulb. The battery gives him his only light but Marquis never did use more than one coal oil lamp, so he is completely satisfied with his electrical system.

No Simple Test

Varieties Of Mushrooms Determined Only By Careful Study

H. T. Gussow, Dominion botanist, says in a letter to The Ottawa Journal that there is no simple test to determine which are good mushrooms, and that many of the tests commonly used are survivals of the dark ages. "They peel very easily," "They have such a good odor," "I boiled some, and put with them a silver coin, and it did not turn black," may be true statements but they decide nothing concerning edibility. Only by careful and detailed study can a collector know which variety to avoid.—*Toronto Star.*

Excuse Was Worn Out

Gus Mancuso, New York City's catcher, is credited with one of the best wile cracks of the recent World series. In the final game of the series at Washington the teams went into the tenth inning with signs indicating that they might settle by playing when the moon came over the mountain. Mancuso walked up to Luvu, Giant hurler, and said, "Gee, I don't know what I can tell the little 'rman. She's not falling for that over time gag any more."

Australian Radium Sold

All the radium produced at Mount Painter, South Australia, the only radium field in the British Empire, has been sold. In seven months 222 cubic millimetres of radium were produced from six tons of ore. The radium was delivered in seven tubes, each about a quarter of an inch long and about as thick as a lead pencil.

LORD MACMILLAN PRAISES BANKERS OF DOMINION

Toronto, Ont.—A definite program calculated to accelerate business betterment in Canada will, it is understood, be announced shortly by Prime Minister R. B. Bennett, the Globe said in an Ottawa despatch. Mr. Bennett is understood to have been encouraged by the recent distinctly improved trend in trade and federal revenue, and is now evolving policies designed to produce a forward movement.

The despatch also reports there will be a conference with provincial authorities to see what can be done in the way of providing short-term and intermediate rural credits proposed by the Macmillan banking commission report.

Another feature of the government's program, the story continues, is the proposal to revive the stagnant construction industry throughout the Dominion, thus providing employment for thousands of artisans who have been out of work more or less for two or three years. An effort will be made to bring about an increase in the prices of farm products, particularly in livestock and butter.

Fair Prices For Products Of The Farm

Prices That Would Be Fair To The Farmer, Distributor And Consumer

Ottawa, Ont.—The importance of securing fair prices for agricultural products was stressed by Hon. H. H. Stevens, Minister of Trade and Commerce, in the course of an address to the eastern Ontario branch of the Canadian Society of Technical Agriculturists' here.

Mr. Stevens suggested that technical agriculturists might draft a detailed policy for Canadian agriculture and periodically suggest minimum prices for agricultural products of number one quality. These prices should be fair to the farmer, the distributor and the consumer.

The minister said he hoped that the day for collectivized farming would never come in Canada. Canadian farmers were individualists, and he hoped that they could always remain so.

Heavy Succession Duties

Ontario To Receive \$425,000 From Sifton Estate
Toronto, Ont.—Ontario treasury officials said a settlement had been reached between the government and the executors of the estate of the late Sir Clifford Sifton, by which the government will receive close to \$425,000 in succession duties.

Certain matters in the estate and the duties to be paid have been in dispute for some time with the result the government threatened to take action to recover.

Demand For Beef

Calgary, Alberta.—Big demand for grain fed beef steers from Canada will be forthcoming from the British market next spring, according to Jack Byers, manager of Western Stock Growers' Association, home from a trip to England.

Opium Cache Seized

Vancouver, B.C.—Opium valued at \$1,100 is held by police and three Chinese are under arrest here charged under the Narcotic Drug Act. Police state the Chinese came ashore from their ship, "City of Victoria," Tuesday morning and were negotiating to sell the opium when they were arrested.

West Is Appreciative

Ottawa, Ont.—Western Canada was deeply appreciative to eastern Canada for several consignments of relief supplies sent by private groups in Ontario and the maritime provinces. W. J. Louche, Conservative member for Rosetown, Sask., stated here.

Squadron In Atlantic

Washington.—Secretary for Commerce Roper said the public works administration had allotted \$500,000 for building a series of smaller, regular size, 500 miles off the Atlantic coast, for experimental purposes.

Naval Programme

British Government Decides To Build Two Large Cruisers

London, Eng.—Faced with the fact other naval powers in their building-up or replacement programme are going in for cruisers of the most powerful type, the British government last night decided to substitute two 9,000-ton cruisers and one 5,400-ton ship for the four smaller cruisers of the 1933 replacement programme.

"If our programme, as already approved, should be carried out, the new cruisers would be definitely inferior to those being developed by other powers," pointed out Sir Bolton Eyres-Monsell, first lord of the admiralty, making the announcement in the House of Commons. "As the House is aware, however, our total cruiser tonnage is limited by the London naval treaty."

"The result as we have been on the horns of a very serious dilemma. We proceeded with our original programme, all cruisers we should be building would be definitely inferior to certain of the cruisers being built by other powers. If, on the other hand, we are to build any cruisers comparable to these vessels, we must reduce our number from four to three. The first alternative could not be accepted."

The substitute 9,000-ton cruisers would have increased armament, which presumably means they will have more numerous "six-inch" guns than the smaller vessels they replace, rather than have eight-inch guns, the cruiser maximum.

Sir Bolton emphasized the British government did not expect the right of other powers to build up to a treaty strength, if they wished. It was recalled, however, Britain suggested when the recent U.S. programme was announced that it might be unfavorable to the progress of disarmament.

Royal Winter Fair

B.C. Sending Youths To Compete In Judging Events

Victoria, B.C.—In co-operation with the Canadian council of boys' and girls' clubs, the B.C. Young Farmers' and Girls' Association is sending four boys and two girls to Toronto to compete in the junior judging events of the Royal Winter Fair.

The two girls, from Vernon district, constitute a poultry judging team, and two boys from Kamloops and two from the Fraser Valley represent calf clubs and swine clubs respectively.

The teams are being accompanied by R. C. Sutton, district agriculturalist, New Westminster, and leave for Toronto, Thursday.

In 1932 the poultry team from Grand Forks, B.C., won first place at Toronto.

Valued Painting Found

Toronto, Ont.—A portrait of Dr. Goldwin Smith, painted by John Russell, was found in the cellar of the University club here, its frame wrecked, the canvas punctured, and the painting badly marred by the moisture of the basement. The artist valued the work at more than \$7,000.

Appointment For Greenwood

London, Eng.—Lord Greenwood, native of Whiteby, Ont., and better known in Canada perhaps as Sir Hamar Greenwood, has been appointed honorary treasurer of the Conservative party. This office has been relinquished by Lord Ebleham, owing to pressure of business and political engagements.

Prefer Canadian Rule

Juneau, Alaska.—The Alaska Native Brotherhood, composed of Indians, asked in a resolution in annual convention that the southeastern Panhandle section of Alaska be sold to Canada. Speakers said the Russians "takes care" of its Indians better "than Uncle Sam does."

French Planes Cross Desert

Gao, French West Africa.—Twenty-five "planes of the French 'Black Squadron'" which are flying from France across Africa arrived here from Blon Five, the lonely Sahara gasoline station. Three ships remained there to help one which had motor trouble.

TAKES OFFICE

Hon. T. D. Pattullo, Premier-elect of British Columbia, who was sworn into office on Nov. 15th, the result of his party's victory in the Provincial elections. This is a new portrait of the Liberal Leader.

Trade Volume Shows Increase In October

Over Seven Million In Excess Of October Last Year

Ottawa, Ont.—Canada's trade volume continued its upward movement during October, according to the national revenue department, the total volume of \$101,303,153 being \$7,592,533 in excess of the corresponding month a year ago. The export balance of approximately \$19,000,000 varied very little.

Eight of the 12 principal items of export showed increases and four dropped.

The most spectacular rise was in exports of unmanufactured nickel, which rose from \$600,443 in October a year ago to \$2,435,472 last month, an increase of 400 per cent.

Export of planks and boards was up for 208 per cent, increase of 100 per cent. in export of partially manufactured copper, 220 per cent. in meat exports and 143 per cent. in fish exports featured the upward surge. Wheat flour and woodpulp exports also showed marked increases.

Student Aviator Injured

Young Chinese Hurt In Accident At Saskatoon Aerodrome

Saskatoon, Sask.—Falling from a high altitude when his machine slipped into a tailspin, Tony Wong, 24-year-old Chinese student aviator, suffered painful injuries in a "plane crash" near the Saskatoon aerodrome. The machine, owned by the Saskatoon Aero Club, was badly damaged. Wong was taken to hospital with injuries to his face and leg.

This was the first "plane mishap" since the Saskatoon Aero Club resumed operations two years ago, but it was the second accident on the Vance farm.

States Idea Is Preposterous

Father Of Lieut. Baillie-Stewart Denies He Has Confessed Guilt

London, Eng.—The startling fact that Lieut. Norman Baillie-Stewart, celebrated "prisoner in the Tower," had fully confessed his guilt shortly after his court-martial and sentence to five years' penal servitude under the Official Secrets Act, was revealed in the House of Commons.

Baillie-Stewart was incarcerated in the Tower of London, several weeks before his conviction on seven out of 10 charges against him, when he was also cashiered from the army in which he was attached to the Seaforth Highlanders.

Captain Alfred Duff Cooper, secretary to the war office, conveyed the information in answer to questions from John McGovern, fiery Laborite, who sought to recover the case.

Colonel Wright, father of Lieut. Norman Baillie-Stewart, young Seaforth Highlander now imprisoned in the Tower of London, told the Daily Mail the idea his son had confessed was "absolutely preposterous."

Statements made in the House of Commons by Alfred Duff Cooper that the young officer "had made a full confession of his guilt soon after his conviction," provoked a denial from another member of the House.

Suggest Market Plan For Farm Produce

Idea Presented By Secretary Of Ontario Growers' Marketing Council

London, Ont.—Radical ideas on the marketing of Canadian agricultural products were presented to local fruit and vegetable growers by C. W. Bauer, secretary of the Ontario Growers' Marketing Council.

Based on the British Agricultural Marketing Act, the scheme, proposed by the council and backed by the Ontario Department of Agriculture, calls for legislation which will empower a majority of organized growers of any one product to market that product and force minority growers to fall in line.

It is hoped to make the scheme applicable throughout the Dominion. Growers in British Columbia, Nova Scotia, New Brunswick and Quebec are understood to be strongly in favor of the plan.

Shipping Durum Wheat

Canadian Raisers Profit By North Dakota Embargo

Minneapolis, Minn.—Canadian raisers of durum wheat have taken advantage of the North Dakota embargo and are shipping their products here. Grain men said that, with only a limited amount of durum needed, the wants will be supplied soon by Canadian durum so that when the North Dakota embargo is lifted farmers of that state which produce the bulk of durum raised in the United States may be without a market.

RECOVERY PLAN FOR CANADA IS LIKELY PENDING

London, Eng.—"Nothing impressed Sir Charles Addis and myself more than the high character, sense of responsibility and integrity of the bankers of Canada," declared Lord Macmillan, chairman of the royal commission which recently investigated the Canadian banking system, when he spoke at a luncheon of the Canadian Chamber of Commerce in London, England. Sir Charles was his English colleague on the commission.

Lord Macmillan was one of the principal guests at the luncheon, others of the distinguished gathering including J. H. Thomas, secretary for the Dominions; Prince Arthur of Connaught, Hon. G. Howard Ferguson, Canadian High Commissioner, and the Lord Mayor of London.

Referring to the cardinal recommendation of the bank commission's report, urging establishment of a central bank, Lord Macmillan said that whether it was acted upon remained to be seen. It was not a technical question, but one of purely economic and business policy.

"I am frankly convinced Canada is on the threshold of a great development," he added.

Lord Macmillan declared the results of the Ottawa pact had so far been most encouraging.

"There is not a Canadian business man or a real citizen of the empire who is not seriously disturbed at the condition of the world today," declared Lord Macmillan.

"It is absurd," the minister said, "to assume the continent of America can for one moment isolate herself from the events and happenings in Europe. It is equally absurd to assume we can be blind to events happening on the American continent."

"We all hope the policy the United States is following will succeed. No body can dogmatize but it is certain the actions of the United States will have their first reactions upon Canada." In the Dominion today there was, to his personal knowledge, unbounded faith and confidence in the future, he added.

Pattullo Cabinet Sworn In

Wealth Of Material In New Legislature Stuns Premier

Victoria, B.C.—The Liberal Government of Thomas Duffin Pattullo was sworn in by Lieutenant-Governor W. A. Gordon Johnson, of British Columbia, one hour after the retiring premier, Dr. Simon Fraser Tolson, had officially tendered his resignation and that of his cabinet.

His cabinet is: Thomas Duffin Pattullo, Premier, Rupert, Premier, president of the council and minister of railways.

George Mole Watt, Vancouver, provincial secretary and minister of education.

Gordon McGregor Sloan, Vancouver, attorney-general.

Arthur Wellesley Gray, New Westminster, minister of lands.

John Hart, Victoria, minister of finance.

Kenneth Cattenach Macdonald, Vernon, minister of agriculture.

George Sherratt Peckham, Nanaimo, minister of mines and labor.

Frank Mitchell Macpherson, Cranbrook, minister of public works.

Of cabinet-making the premier said:

"The only thing more distressing than running a government is forming one, because of the personal equation. There is a wealth of material in the new legislature."

"Given capacity, I have deemed it desirable all portions of the province should be represented. The new cabinet embraces both requirements."

Moving Famous Landmark

London, Eng.—Westminster hospital, almost as famous a London landmark as either of its big neighbors, the Houses of Parliament and the Abbey, is to come down. After 20 years' deliberation the government, chief of whom is the Prince of Wales, have decided to make a move to a site some way farther west, near to Lambeth Bridge.

NEW YORK'S NEW MAYOR AFTER VICTORY

Mayor-elect Fiorello H. LaGuardia, pictured with Mrs. LaGuardia as they acknowledge the tumultuous ovation accorded them on their arrival at the hotel to celebrate the Fusion victory in New York's municipal election. The mayor-elect shows no trace of the strain after such a strenuous campaign.

A figurehead representing a Chinese dragon, standing on a pedestal in Stanley Park, Vancouver, is all that is left of the 6,000 ton C. P. liner Empress of Japan, junked in 1922 after 31 years of service. The new Empress of Japan, of 26,000 tons, is the holder of all speed records on the Pacific between B. C. ports and the Orient.

Civilisation is steadily pushing the frontier back in the fur trade, but the trapper still supplies 70 per cent of the furs handled in the fur marts of Canada, according to a recent C. P. R. bulletin.

John Patrick Ambrose, investigator, freight claims department, C. P. offices, Montreal, won \$70,000 in Irish Free State sweepstakes when his ticket drew Denbigh which was placed second in the Cambridgeshire. Mr. Ambrose has no special plans for the future and will continue to work in the C. P. R. offices.

Gratification and relief is the general reaction throughout Canada, as expressed editorially in the press, over the settlement of the wage dispute between the railway employees and both Canadian railways. The compromise deduction of five per cent arrived at is to be eliminated in a year, unless its retention is mutually agreed on.

Immigration is much in the air these days and Major W. J. Baxter, well known Toronto expert, addressing the Advertising Club of Montreal recently urged that once the time is opportune Canadians must get on with the job of closer settlement. He gave it as his view that the best way of achieving this end was by means of advertising.

Canadian railways earned a gross revenue of \$23,730,041 in August which was an increase over the August 1932 revenues of \$23,110, or 27 per cent. This was the second month this year to show an increase over the corresponding month last year.

Get Seed Oats Tested.

Farmers who have seed oats for sale should send one-pound samples to the Dominion Seed Branch at Calgary for germination tests.

Up to three samples will be tested free and a charge of fifty cents will be made for each additional sample. The Provincial Department of Agriculture advises that no chances be taken in seeding frozen grain.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 15 to Nov. 14
Elk, goat, 1—Dec. 14
Grouse, Oct. 1—31
Hungarian Partridge, Sept. 15—Nov. 30
Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—March 31
Muskrat, March 1—April 30
No open season on ruffed grouse, prairie chicken, beaver or buffalo.

The High Cost of Thinking.

Brain workers ought not to take too much to heart the disconcerting news Dr. Crile, renowned surgeon, gave out recently in an address at Atlanta, Ga., says the Houston (Texas) Press.

Discouraging on the results of some of his researches, the noted scientist declared the thinkers, the leaders of modern civilisation, are more susceptible to sickness and disease than are other classes. He continues: "Their high mental activity may and often does wear out the entire physical mechanism."

A glance about us, however, should reassure rather discourage the brain workers. Regardless of all that has been said about the killing pace of our nervous existence, we find amongst the most prominent "leaders of civilisation" men who have lived beyond the Biblical span and who are still hearty and active. Notable among these is John D. Rockefeller Sr.

The ability of the mentally active to withstand sickness depends largely upon his mode of living rather than upon the intensity of his concentration. To live rightly as a youth is the safest assurance against bodily ills. Thereafter the important thing is to balance discreetly play and work, relaxation and concentration.

Change in the Auto License Year.

Officials of the Alberta Automobile Association, that are behind the movement for a change in the start of the licensing year for automobiles, state that the movement is receiving whole hearted support wherever the petitions for a change are presented.

The advantages for making the change are many, some of which have already been noted in The Sun. The only obstacle in sight is the simple fact that the Government would go thru one year—the first in which the license year was set back to April 1—with no automobile license revenue in the first three months.

This might necessitate some change in Government financing, but it should not be difficult to accomplish this. Its fiscal year ends on March 31, and the license year should end then, too. The revenue from this source would come in at the beginning of the Government year, not at the end, as at present. This means that in one financial year the Government would have to do without the automobile license fees.

HOW TO AVOID ILLNESS

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincamra, the great tonic that has won over 20,000 recommendations from medical men.

Wincamra is a delicious wine, not a drug. In each bottle there are all the nourishing elements of 2½ lbs. of grapes added to the strengthening elements of leaf and guaranteed malt extracts.

These elements in Wincamra will quickly restore lost energy. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon years will drop from your shoulders.

To pick you up when you are out of sorts, to soothe your nerves, enrich your blood, or in cases of nervousness, insomnia, anaemia and debility, take Wincamra. At all druggists—Sole Agents: Harold F. Ritchie & Co., Ltd., Toronto.

OCCASIONAL WIFE

By EDNA ROSE WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to the level in their fortune when she comes of age. They are faced with the problem of "marriage or career" and she decides not to want to tie down her life to a man who has so much promise as a sculptor. At an art school dance, Gus Matson, Peter's roommate, who is jealous of Peter's success, takes Camilla out on the lawn to tell her something she should know about Peter. Gus tells Camilla Peter is a cheat, that he only wants her money, and that he, Gus, loves her himself. At that moment Peter appears on the scene and knocks Gus flat. He takes the way home from the party Camilla tells Peter they are going to do something about their problem. She decides that they are to be married, and until Peter establishes himself, go on living their separate lives. Above Peter's protests she carries her point. Gus leaves Peter, and Peter gets money. They are married quietly and over their wedding dinner together, happily talk of their likes and dislikes. Peter starts his new studio and presents her with a piece of statuary he has been working on secretly for a long time. They decide that they are going to be wonderfully happy despite the fact that they will be living apart.

(Now Go On With The Story)

CHAPTER XVIII

Camilla had no time in looking for a position. She might have taken her summer of leisure and happiness without a care, but that was not like Camilla. Already she experienced a wave of panic when she thought of the possibility of being dependent upon Peter. Of course, she never would allow herself to do that, but she knew that the only way in which she could free him of that responsibility was to get a position and prove that she could take care of herself adequately. That had to be proved, too, before the day arrived when she would no longer be dependent upon the Hoyt resources.

She preferred to relinquish that dependence as soon as possible, now that she was secretly married to Peter. There was one point in her favor, that her career embraced one of the few kinds of business that were prospering in the midst of the de-

pression. Advertising demanded the services of more commercial artists than any other one activity, and advertising was one of the few lines that prospered when business was in the doldrums.

The less business there was, the more desperately competitors advertised their products and contended for the favor of the buying public.

There was no reason for her to consider the help wanted columns in these days. No one needed to advertise for help and little was needed. A change in the personnel of any business was more likely to dispose of surplus help than to require more.

Camilla surmised that her only chance was to submit working proofs of her originality, hoping that they would attract the optimistic eye of some advertising expert.

She worked out a set of water color plates in the modernistic vogue of angles, of which she was rather proud. There was also a group of juvenile subjects that she had sketched during hours of watching the children who came to play in the park, and of which diversion she never tired. These she arranged in a portfolio and set out, with a list of advertising agencies in her purse.

Already, she had been Peter's wife for a week, during which he had permitted her no time to consider an occupation. They had talked for hours and walked in the park and shared frugal little dinners in small restaurants that proclaimed their courtesy of "Tables for Ladies." But neither of them minded this economical manner of getting acquainted.

Discovering all the little faults and virtues of each other, learning what subjects to avoid in their conversations that might irritate the other, every moment of these was exquisite joy. And the quality of food or the services of waiters was of infinitesimal consequence, as compared with smiling into each other's eyes across any table and sharing little intimate jests that interested no one in the world except themselves.

These things would go on forever, of course, but in this genesis of their life together, it was so sweet just to forget everything else and delight in its novelty. It was Camilla who insisted that they must both get to work in earnest, else there would be no happy future, of which they talked and dreamed so confidently. The summer term at National began, and Peter resumed his studies and work with new gravity, while Camilla began her quest for employment.

Their experiment with marriage was just one of modern youth's desperate efforts to adjust itself to the complicated demands made by life and a rapidly changing world. In the process of innumerable experiences, it makes some startling and daring attempts to solve the increasing problems of marriage, but being brave and candid and loyal, most of them revert again to the same basic fundamentals upon which life began.

Reconciling the standards and ideals of the past with present economic problems is not a task which can be accomplished in a day, nor by one theory. It must be worked out slowly and painfully, as any problem is solved, at the expense of effort and human happiness.

Rebellious and defiant, youth takes matters into its own hands when conventions and economical crises become entangled, only to discover that the primal laws of nature are stronger than all the other combined elements ranged against them, and they fall back to the step again.

Young America—the real present pioneer Americans—fiercely loyal to its new nation, yet lingering faithfully in foreign traditions, presents one of the most crucial of these problems. Their situation is not so different from that of the early pioneers of America, except in its outward aspects. The same integrity, fortitude, endurance and faith is required of them to conquer their new world. Just so, Camilla and Peter Anson faced strange wilderness of danger and a life of conquest when they entered their marriage experiment, as did those new unions that, set out in covered wagons across the prairies and mountains and deserts to conquer the west of young America.

When Camilla began to state her requests for work at the various agencies, advertising managers regarded her with varying attitudes of incredulous scorn, but those who dared to look at her samples raised their eyebrows with mild interest and were a little more cordial when she took her leave. However—they were very sorry—they could give her no

encouragement. Their staffs were quite adequate in the present situation, also satisfactory, and a voluntary resignation was about as probable as a snowstorm in the Sahara.

In one office, a Mr. Bowman was a trifle more enthusiastic, but just as vague about any possibility of needing her services.

He seemed surprised at her industry in the face of existing conditions. "You did all of all these without a definite use for them—just for samples? Most applicants think they are doing well to have one idea floating around their heads."

"Oh, I have many other sketches and water color subjects, I develop every idea I have, even if it isn't very promising at first. One never knows what might be evolved from it in the process of working it out," she explained sedately. Felt invariably told her that she looked like a little girl, and Camilla feared that the agency managers would think so, too. So she searched her vocabulary for credit phrases.

Mr. Bowman smiled with amusement. "You like to work, then?"

"Why, of course, I should think everyone would like to work—that is, if he can do the kind of work he enjoys. Drawing is my work and my pleasure, too."

"Well most people imagine they would like to work if they could get the work to do. When they get it, that's different. Perhaps it is like everything we want when we get it."

"You mean that when we get things we have wanted, we lose interest in the possession. But work is different, isn't it? Getting it is only the beginning toward the end."

"Many people don't think so," her adviser mused. He seemed to be in a leisurely and conversational mood, for which Camilla was grateful. These little excursions into the business element and contacts with the administrators were a revelation to her, and valuable.

"You would be surprised how many people believe that if they just had a chance to do something important, they would meet the requirements. Yet they never would consider doing the work first on the possibility of its meeting unknown requirements. It is so much easier to dream than to do, and more popular to have faith in their own ability than to test it, because you have worked dreams into reality and proved to yourself what you can do. The work is excellent. I am only sorry that there is no possibility of my taking you on."

"I appreciate your compliments, Mr. Bowman. You give me encouragement."

"You need it—particularly now. But always remember this: no matter how clever you are or how industrious, there are always many others who are clever and industrious to compete with you. That explains why the dreamer can't get in at all. It is difficult enough for those who are capable and willing to work."

Camilla reflected that she might resent this man's coldly practical observations, except that she knew he was right and knew what he was talking about. She felt a little friendly toward him, but he took her name and address and promised to let her know if he had anything she could do. All the managers whom she interviewed had done that, so it delineated nothing in particular. It was just as probable that she never would see him again.

(To Be Continued.)

Across The Road

Life is like walking along a crowded street; there always seem to be fewer obstacles to getting along on the opposite pavement, and yet, if one crosses over, matters are rarely mended.—Professor Huxley.

Not New Phenomenon

Making Enemies Is Characteristic Of German Diplomacy

Noel Panter, British correspondent at Munich who was put in prison for describing heavily armed Storm Troopers in a Hitler review, symbolizes not only the efforts to throttle the press in the Reich and foreign newspaper men as well, but the obstinate, almost cheerful, Hitlerite determination to make as many enemies as possible in the rest of the world.

This is not a new phenomenon. It has been characteristic of German diplomacy, in many respects, for sixty years and has caused incalculable harm to the German nation. Hitler tells his people that they are "ringed about by foes" and proceeds to make more enemies for Germany at every turn with his idiotic persecution of the Jews; the toleration, until lately, of attacks upon peaceful foreigners in Germany and now this persecution of a reporter who, in describing merely what he saw, has "injured" the Hitlerites by adding a few new facts to the growing accumulation that shows they really are turning Germany into an armed camp.—New York Evening Post.

Program Printed On Silk

Used At Montreal When Late King Edward's Birth Was Celebrated

A program printed on silk, of the fireworks display held on the ice in the St. Lawrence River in front of Montreal on the night of February 10, 1942, to celebrate the birth of the Prince of Wales, later King Edward, has been presented to the McCord National Museum, McGill University, by Mrs. George Ahern of Montreal.

Judging from the finely printed list of events the celebration must have been a magnificent affair, as the fireworks included: "A New Tree With Fixed Star and Illumination," "Figure of Eight Illuminated," "Two Splendid Chinese Fountains" and "New Moon With Fixed Stars." The Royal Salute was fired by the Montreal Royal Artillery, according to the program, which concluded with "God Save the Queen."

British Malaya reports a general distribution of increased buying power there.

The Greeks are said to be the first farmers who cultivated the turnip.

Buck That

Cough or Cold

With Buckley's
It costs only a few cents to knock out a cough or cold with BUCKLEY'S MUXTRA. Because Buckley's is so superior, only a few doses are needed to subdue the toughest cough or cold. And Buckley's can be diluted with three times its volume of water making it even still further.

Will not upset your stomach. Just safe, New Britain, With "Good" taste, "No" breath, "No" side effects. Play safe. Refuse substitutes. Buckley's is sold everywhere.

The Juvenile Hockeyists' Whist Drive in the Town Hall, on

Friday, Dec. 1st.

at 8.30 p.m.

Come Awa mi' As and help the Braw Laddies.

Inga M.D. Notes.

Secretary Joe Best paid Stony Plain a visit on Saturday last, and had a very successful day, receiving taxes from Inga ratepayers. Late in the afternoon there was such a rush of ratepayers wanting to pay their taxes that the Secretary was unable to attend to all, so Saturday, Dec. 2, has been set as the day when the Secretary will again be at the Royal Hotel for the purpose of collecting Inga taxes.

Inga Councillors meet at the office of the Secretary Tues. Nov. 28th.

The Secretary put in a busy day yesterday at Carvel, and will be at Duffield on Saturday next, the 25th.

Work of a Miscreant.

The Messieurs M. & M. Soldan, Heatherdown farmers, drove their team to Stony Plain on Saturday afternoon, to have a load of grain crushed at Armbruster's mill. This job completed they went to a restaurant to dine, preparatory to returning home. On going back to their team, which had been left hooked to the tie rack at the mill, they found that some miscreant had been doing the Jack-the-Ripper act on the harness. The tugs, bridles and bitlines had been cut with some sharp instrument.

Work to Start on Jasper Rd.

The Minister of Public Works, Hon O.L. McPherson, intimates that final arrangements have been made between the federal and provincial authorities for the commencement of winter work on Jasper Highway. The camps will be ready for occupation in the course of a few weeks. The work will include filling in some high trestles on the old railway grade.

Stony Plain and District

Mr and Mrs J.A. Baraie have taken up their residence at San Diego, Calif., for the winter months.

Mr Sam Baillie, the Graminia farmer, was a business visitor in Stony Plain on Saturday.

Mr Albert Wuertz has under consideration a very favorable offer to move his business down to Brightbank district; the offer including a free site.

A meeting of Senior Hockey club members will be held tonight the 23d, at the Post-office.

Lutheran services in English were held here on Sunday evening by Pastor Kuring, who spoke on the 450th anniversary of the birth of Dr Martin Luther.

STONY PLAIN.

The Curling Club Dance.

The dance sponsored by the floors and members of the Stony Plain curling club in Moose hall Friday last was a very successful affair, dancers being present from the City, Spruce Grove, Holborn, and those invited had a very enjoyable time. A goodly sum over expenses was cleared. Barth's orchestra supplied the music. It is probable another of these very enjoyable affairs will be held before the close of the season.

Holborn Happenings.

Holborn U.F.A. and U.F.W. will put on a series of whist drives during the winter, the first being held Wed. Nov. 22. Score cards 10c. Prizes will be given to the highest scorers.

The annual grain show of Holborn Junior club, Alberta champions and winners of Dept. of Agriculture Cup for 1933, will take place at the Hall, Friday Dec. 1st, starting 10 a.m.

Speakers from University Dept. of Extension and Dept. of Agriculture will address the gathering. A lantern slide lecture will be delivered during the afternoon. A banquet in honor of the champions at 8 p.m. will wind up the celebrations. A cordial invitation is extended to all those interested.

Brightbank News

Field work has been going on in this district since the recent warm spell. Many hunters took to the timber during the cold weather, and since have returned with their venison.

Mr Berry has been acting as a guide for a party of duck hunters from the City.

Mr H Stirling has returned from Jasper, where he had been on police duty during the summer months.

Miss Marjorie Young and Miss Grace Summerfield have left for the hunting grounds west of Bear Lake, taking with them a team and wagon; also their two famous saddle horses.

Mr John Kotscherofsky is completing the inside finishing of his new house.

The recent warm spell has brought with it a sort of flu, which seems to affect the hearts of the sufferers.

The many friends of Miss Ella Krouse are pleased to see her up and around again and like her real old happy self. She says everything looks bright again.

108 Days from Seed to Granary—Farmer Agent Is Well Pleased.

"Last year, 1932," writes James G. Henry, Aberdeen, Sask., "the fertilized wheat matured and ripened 7 days earlier than the check plots; this year, 1933, it was fully 10 days earlier. I had an 80-acre field in which the check plots (there were several in different places) were badly affected by 'Brown Leaf' or root rot, showing very plainly that we would have lost more than enough on this one 80-acre field to pay for the 6 tons of A.P. fertilizer used on the 400 acres."

The Sun's Calendar.

A Great Combination.

Wembley is surely stepping out. We now have with us a dancing teacher, a poet, and a news home!—Wembley item in Grand Prairie Tribune.

An "Old Favorites" Contest.

Our attention has been drawn to an interesting Contest just launched by the Family Herald and Weekly Star. \$1500.00 are offered in Cash Prizes to those most successfully solving a set of picture puzzles.

Each puzzle picture illustrates the title of an "Old Favorites" song, the object of the contest being to name each one of them correctly. A book featuring 1600 old Favorite Song titles has been compiled by the publishers. This book contains all of the songs which the puzzle pictures illustrate and a Poppy is given to every active contestant as an aid. The pictures are very cleverly drawn and provide interesting entertainment to those taking part. The nature of the Contest itself, as the name implies, brings back to mind those old familiar tunes which never seem to grow old and which recall memories of those happy days when they were the current musical hits.

Any of our readers will find it well worth while dropping a line to the Family Herald and Weekly Star, at Montreal, for full details of this Contest which will be gladly sent to anyone interested, along with a sample copy of the paper.

New Mail Schedule.
